1. INTRODUCTION

This document presents the improvements, corrections and upgrades carried out in the context of localization since 12/01/2023 on additional components (CPOS drivers, CPTX, etc.).

These upgrades are compatible with all Y2 versions that comply with the lifecycle policy.

2. GERMANY

2.1. CPOS Driver for the EFR Taxbox of EFSTA

To communicate with EFSTA's EFR Taxbox, you need to install version 1.6.24 or higher of the Cegid CPOS driver "CPOS.TaxBox.DE.EFSTA".

Earlier versions of the Cegid CPOS driver "CPOS.TaxBox.DE.EFSTA" are no longer supported by Cegid.

2.1.1. CPOS.TaxBox.DE.EFSTA Version 1.7.25 on 01/22/2024

Driver settings for Taxbox sharing (mobile systems)

Location ID parameter modified: Possibility of leaving it blank. If this is the case, the CPOS driver will use the store code associated with the cash register to communicate with the EFSTA EFR.

Modification of Terminal ID parameter. Possibility of leaving it blank. In this case, the CPOS driver will use the cash register code for dialogue with EFSTA's EFR.

This upgrade enables shared access to the TaxBox via InStoreHub.

For Live Store, a version of InStoreHub 1.3.310 or higher is required.

Not supported by mPOS.

2.1.2. CPOS.TaxBox.DE.EFSTA Version 1.7.26 on 07/11/2024

Correction to the ERF availability test

During the first EFR availability test, the test was systematically performed on the localhost IP address instead of the IP address defined in the driver settings. This only returned an error when the EFR was not installed on the cash register.

2.1.3. CPOS.TaxBox.DE.EFSTA Version 1.7.28 on 10/08/2024

Corrected RECEIPTID verb return error (Live Store only)

Regression introduced with version 1.7.26. The driver would return an error if the CPOS RECEIPTID verb did not return a value. This error only occurred when using driver version 1.7.26 with Live Store.

2.2. CPOSJournalViewer

CPOSJournalViewer.exe version 1.0.0.10 dated 21/08/2018 is used to view files containing the electronic journal.

3. SAUDI ARABIA

3.1. Edicom Taxbox CPOS Driver

In order to communicate with the Edicom Taxbox, it is required to install version 3.1.32 or higher of the Cegid CPOS driver "Cegid.CPOS.Edicom".

Earlier versions of the Cegid CPOS driver « Cegid.CPOS.Edicom » are no longer supported by Cegid.

3.1.1. Cegid.CPOS.Edicom Version 2.3.23 on 06/02/2024

First version

3.1.2. Cegid.CPOS.Edicom Version 2.4.25 on 08/13/2024

Modification of tax mapping management

/!\ If updating from a previous driver version, the tax mapping must be updated in the driver settings.

Calling the Edicom API with parameter DuplicateControl=1

Handles retries in the event of no response from Edicom

Request of the original transaction number if this information is not present in Y2

Example: Down payment refund

3.1.3. Cegid.CPOS.Edicom Version 2.5.27 on 10/11/2024

Management of Branch_ID

Ability to set Branch_ID to transmit information to Edicom (optional).

3.1.4. Cegid.CPOS.Edicom Version 2.6.29 on 11/05/2024

Management of Branch_ID

Relocation of the tag in the data sequence sent to Edicom.

Customer address format

Change of the customer address format in the data sequence sent to Edicom.

Return of items from the same original receipt

Corrected an error that was preventing return of items from a receipt holding several rows of sales.

3.1.5. Cegid.CPOS.Edicom Version 3.1.32 on 01/27/2025

Setting of Financial Items document type 386

Ability to set a list of financial items allowing the payment of a deposit. If a transaction contains only financial items from this list, the document type will be “386” (Prepayment Invoice) instead of “388” (Tax Invoice).

Setting of “Prepaid” payment methods

Ability to set up a list of “Prepaid” payment modes used to apply a deposit (see above) on the pickup receipt. The total of these payments will be entered in the <Paid_amount> tag of the data frame sent to the fiscal authority and the <Payable_amount> tag will be equal to the total amount of the receipt minus <Paid_amount>.

Handling of “Warning” and “Error” type errors

Warning type errors returned by Edicom will no longer result in transactions being rejected. This error will only be recorded locally in the logs.

3.1.6. Cegid.CPOS.Edicom Version 3.3.34 02/20/2025

Added the « Prepaid » information into the data frame intended for Edicom

Added information relating to payment methods of the « Prepaid » type into the data frame intended for Edicom.

If the Y2 version has a CPOS version lower than 1961, CBS 250312_FUNCTIONS_LOCAL_CPOS_Z06_ITM (or a more recent version) must be system on the Y2 environment (see §CBS *_FUNCTIONS_LOCAL_CPOS_*).

Y2 version requirements:

- 22.0.0.1964 on 04/14/2025
- 23.0.0.1702 on 04/14/2025
- 24.0.0.1747 on 04/14/2025
- 25 ➔ All versions

4. SPAIN (BASQUE COUNTRY)

4.1. Ekon Taxbox CPOS driver

In order to communicate with the Ekon Taxbox for Spanish stores based in the Basque Country, it is required to install version 1.0.6 or higher of the Cegid CPOS driver "CPOS.TaxBox.Ekon".

Earlier versions of the Cegid CPOS driver « CPOS.TaxBox.Ekon » are no longer supported by Cegid.

4.1.1. CPOS.TaxBox.Ekon Version 1.0.12 on 04/08/2024

Receipt reference management

Ability to choose the receipt reference to be sent to the driver (Internal reference or tax reference).

4.1.2. CPOS.TaxBox.Ekon Version 2.0.18 on 01/24/2025

"Claves de REGÍMENES DE IVA Y OPERACIONES CON TRASCENDENCIA TRIBUTARIA" settings

Ability to configure the "clavedregimenivaop" information sent in the json data frame to Ekon (for example, if the store is based in the Canary Islands)

Offline transaction management (Ekon not reachable)

Ability to configure the driver to ask the user if they want to validate and save the transaction in case Ekon is not reachable.

Unsigned transactions will be automatically sent upon closing (if system access has been restored). It will also be possible to launch fiscal processing during the day using a dedicated tool.

4.1.3. CPOS.TaxBox.Ekon Version 2.2.24 on 6/26/2025

Transaction format modification (sujeta=0)

In cases where the driver is set for "Non sujeta" stores, the JSON frame has been adapted.

Referenced returns management

Added setting for managing referenced returns (FacturaRectificas)

Management of unknown error returns

Improved error management in cases where the response does not contain an error message (Unknown error)

5. GREECE

5.1. Epsilonnet Taxbox CPOS Driver

In order to communicate with the Epsilonnet Taxbox APIs, it is required to install version 1.6.17 or higher of the Cegid CPOS driver "CPOS.TaxBox.gr.EpsilonDigital".

Earlier versions of the Cegid CPOS driver « CPOS.TaxBox.gr.EpsilonDigital » are no longer supported by Cegid.

5.1.1. CPOS.TaxBox.gr.EpsilonDigital Version 1.1.8 on 06/17/2024

First version

5.1.2. CPOS.TaxBox.gr.EpsilonDigital Version 1.2.11 on 08/13/2024

Tax exemption management

Ability to map Y2 tax exemption codes to the exemption code expected by Epsilonnet

Management of product classification mapping

Ability to manage product classifications expected by Epsilonnet

5.1.3. CPOS.TaxBox.gr.EpsilonDigital Version 1.3.12 on 08/20/2024

Mapping of tax document types

Ability to modify default mapping of tax document types

5.1.4. CPOS.TaxBox.gr.EpsilonDigital Version 1.4.14 on 09/16/2024

Electronic payment integration

The GetPayment and CancelPayment functions have been added so that they can be called by the CPOS TPE (EFT) driver.

During transaction validation, the driver calls the CBS GetPaymentsForGreekTaxBox function (see §CBS *_GREEC_EPSILONET_*) to retrieve the signature and transactionId of each electronic payment, and completes the information transmitted to Epsilonnet.

5.1.5. CPOS.TaxBox.gr.EpsilonDigital Version 1.6.17 on 10/10/2024

Taking into account change back payment

Payment amounts sent to Epsilonnet take into account the change given back.

storeAddress tag

Ability to add address information that will be sent via the “storeAddress” tag in the frame to Epsilonnet. The information entered in this parameter will enable Epsilonnet to personalize the generated pdf document.

5.1.6. CPOS.TaxBox.gr.EpsilonDigital Version 1.6.18 on 10/11/2024

Optimization of change amount return

No blocage anymore on giving change back for payments of the bank card type.

5.1.7. CPOS.TaxBox.gr.EpsilonDigital Version 1.8.20 on 11/15/2024

Ability to set different classifications for receipts processed as invoices.

Added to classification mapping the ability to set a different classification type and category for receipts processed as invoices.

New "InvoiceType" for service receipts

Ability to set a different "InvoiceType" for receipts containing services only.

Same for invoices containing only services.

5.1.8. CPOS.TaxBox.gr.EpsilonDigital Version 1.9.23 on 12/04/2024

Retrieval of electronic payment signatures without CBS

Ability to retrieve electronic payment signatures without having to install the CBS *_GREEC_EPSILONET_*.

For Y2 versions prior to the following versions, the use of the CBS remains mandatory:

- 21.0.0.2077 on 09/16/2024
- 22.0.0.1813 on 09/16/2024
- 23.0.0.1546 on 09/16/2024
- 24.0.0.1579 on 09/16/2024
- 25 ➔ All versions

5.1.9. CPOS.TaxBox.gr.EpsilonDigital Version 2.0.26 on 02/06/2025

Managing tax refund

Requires at least a version of CBS tax refund 1.4.2. Z265 of 23/01/2025 available for download on Cegid Life.

The transaction will be sent to Epsilonnet with the mandatory customer information (name, postal code, city, country of residence, nationality and passport number) and tagged tax refund if the user has indicated that the customer wishes to receive a tax refund.

/!\ : The driver will refuse to process the transaction for fiscal purposes if the customer information is incomplete. If the tax refund slip is not issued, it is up to the user to cancel the transaction in Y2.

5.1.10. CPOS.TaxBox.gr.EpsilonDigital Version 3.1.7 on 04/30/2025

PDF management

Following the legal requirement to no longer send transactions to MyData in PDF format, it is possible to configure the driver to instruct Epsilonnet to no longer send PDFs (tag transmissiontype=5)

5.1.11. CPOS.TaxBox.gr.EpsilonDigital Version 3.2.9 on 06/18/2025

Correction of tax information format regression

Keys were no longer saved in upper case in the FISCALSIGNATURE and FISCALHEADERPRIVATEDATA fields since version 3.1.7 (upgrade required if using CPOS 3.1.7).

5.1.12. CPOS.TaxBox.gr.EpsilonDigital Version 4.0.4 on 07/08/2025

Offline transaction management (Epsilonnet not reachable)

Ability to configure the driver to ask the user if they want to validate and save the transaction in case Epsilonnet is not reachable.

Unsigned transactions will be automatically sent upon closing (if system access has been restored).

5.1.13. CPOS.TaxBox.gr.EpsilonDigital Version 4.0.9 on 08/27/2025

Optimization following pilot phase feedback on "Offline transaction management (Epsilonnet not reachable)"

5.1.14. CPOS.TaxBox.gr.EpsilonDigital Version 4.1.12 on 09/25/2025

Correction for zero receipts

The driver no longer generates an error indicating that the payment mode is mandatory for receipts with a total of 0, i.e., receipts without a payment method line.

5.1.15. CPOS.TaxBox.gr.EpsilonDigital Version 4.2.15 on 10/31/2025

Management of the IRIS payment method

Addition of the setting for the mapping of the new IRIS method.

5.2. CBS *_GREEC_EPSILONET_*

The CBS *_GREEC_EPSILONET_* must be installed on the Y2 environment to benefit from integration with electronic payment systems.

5.2.1. 20240909_GREEC_EPSILONET_Z05_ITM.cptx

First version

- GetReceiptForGreekTaxBox function: returns transaction information to the CPOS TPE driver.
- GetPaymentsForGreekTaxBox function: returns "signature" and "TransactionId" information on payment transactions to the CPOS Taxbox driver. Only for transactions made with an Adyen terminal (please check with Adyen for the version of the EPT firmware, CPOS driver version and settings, etc.).

5.2.2. 20241002_GREEC_EPSILONET_Z07_ITM.cptx

Modification of calculation of the tax reference

- Correction of an issue that could cause the next tax reference to be calculated incorrectly depending on how it was set.

5.2.3. 20250320_GREEC_EPSILONET_Z08_ITM.cptx

Upgrade of the feature GetPaymentsForGreekTaxBox

- GetPaymentsForGreekTaxBox function: allows the CPOS Taxbox driver to return the "signature" and "TransactionId" information of electronic transactions for terminals managed by drivers made by MWC (please check with MWC for the PSPs concerned, firmware, CPOS driver version and settings, etc.).

6. ITALY

6.1. Epson RT90

In order to communicate with Epson fiscal printers, it is required to install version 2.13.67 or higher of the Cegid CPOS driver « CPOS.FiscalPrinter.IT.EpsonRT ».

Earlier versions of the Cegid CPOS driver are no longer supported by Cegid.

6.1.1. CPOS.FiscalPrinter.IT.EpsonRT Version 2.11.60 on 12/20/2023

Closing the connection with the fiscal printer

The driver closes the link with the printer even if the opening of this link has failed. Required for printer sharing via InStoreHub.

For Live Store, a version of InStoreHub 1.3.310 or higher is required.

For MPOS, a version of InStoreHub 1.1.2.60 or higher is required.

6.1.2. CPOS.FiscalPrinter.IT.EpsonRT Version 2.11.61 on 06/19/2024

Paper cutting in non- tax mode

Manages the "TEX_TOTAL" receipt cutting order when printing a non-tax document. As the receipt cutting order is not handled by Epson OPOS, when the driver receives the TEX_TOTAL order, the non-tax document is closed, then a new non-tax document is opened.

6.1.3. CPOS.FiscalPrinter.IT.EpsonRT Version 2.13.67 on 09/26/2025

Sending electronic payment transaction reference to the fiscal printer

Sending the electronic payment transaction reference (STAN or TransactionID) to the fiscal printer (mandatory starting 01/01/2026)

For versions of Y2 prior to the following versions (CPOS module version prior to 1957), the use of CBS *_FUNCTIONS_LOCAL_CPOS_* (minimum version Z07) will be mandatory:

- 21.0.0.2077 on 09/16/2024
- 22.0.0.1813 on 09/16/2024
- 23.0.0.1546 on 09/16/2024
- 24.0.0.1579 on 09/16/2024
- 25 ➔ All versions

6.1.4. CPOS.FiscalPrinter.IT.EpsonRT Version 2.14.70 on 11/05/2025

Smart Scontrino

Ability to configure the driver to use the Epson - Scontrino Smart function.

7. MALAYSIA

7.1. Edicom Taxbox CPOS Driver

In order to communicate with the APIs of the Edicom Taxbox, it is required to install version 2.6.16 or higher of the Cegid CPOS driver « Cegid.TaxBox.my.Edicom ».

Earlier versions of the Cegid CPOS driver « Cegid.CPOS.Edicom » are no longer supported by Cegid.

7.1.1. Cegid.CPOS.my.Edicom Version 1.0.2 on 07/16/2024

First version

7.1.2. Cegid.CPOS.my.Edicom Version 2.1.7 on 10/10/2024

Transaction confirmation management at cash register closure

Allows B2C transactions to be validated in Y2 without waiting for Edicom's response.

7.1.3. Cegid.CPOS.my.Edicom Version 2.2.9 on 10/31/2024

Added missing tags

The tags <Taxable_amount> and <Tax_exemption_reason> under the tag <TAX_LINE>are added VAT rate for the row in question is equal to 0.

The tags <Additional_ID_type> and <Additional_ID_value> are added by default for a customer.

Rejection of returns with multiple rows

Return transactions with several lines of the same original receipt are no longer rejected.

7.1.4. Cegid.CPOS.Edicom Version 2.3.11 on 11/15/2024

Date and time in UTC time zone

Documents are transmitted with date and time set in the UTC time zone, instead of in the cash register's local time zone. It is therefore important that Windows is set to the correct time zone on the cash register.

Improvement of the return with receipt process

The “IRBM ID” is no longer required if the return receipt is associated with an original receipt.

Ability to set return document type

It is now possible to set the type of return document to replace the default “04”.

Setting Financial Items to be excluded from transmission to the tax authorities

Implementation of a setting to define a list of Financial Items for which the transaction receipt will not be sent to the tax authorities, provided that the receipt contains only the specified items and that these items have a VAT rate of 0%.

7.1.5. Cegid.CPOS.Edicom Version 2.6.16 on 12/11/2024

Original receipt reference in case of receipt deletion

Sending of the correct original receipt reference when a receipt is canceled.

<Country_subdivision> and <Country_code> Info by default

The customer's default <Country_subdivision> and <Country_code> fields are now filled in with the values 17 and MYS respectively.

7.1.6. Cegid.CPOS.my.Edicom Version 2.7.29 on 11/05/2025

Offline mode management (Edicom not reachable)

Ability to configure the driver to ask the user if they want to validate and save the transaction in case Edicom is not reachable.

Unsigned transactions will be automatically sent upon closing (if system access has been restored).

8. POLAND

8.1. Posnet

To communicate with Posnet fiscal printers, version 1.13.11 or higher of the Cegid CPOS driver "Jantar.CPOS.OPOS" is required.

Earlier versions of the Cegid CPOS driver are no longer supported by Cegid.

8.1.1. Jantar.CPOS.OPOS Version 1.13.16 on 06/29/2023

Printing non-tax receipts and QRCode

Management of printing non-tax receipts.

Management of printing a QR Code on tax receipts.

Management of printing a QR Code on non-tax receipts.

This new feature requires a compatible Posnet printer, an update of the Opos drivers (version 1.13.96 of the JantarFiscalPrinterServiceObjectLib.dll) and the ability to print non-tax receipts in the Opos settings.

8.1.2. Jantar.CPOS.OPOS Version 1.13.21 on 06/18/2025

This new version requires updating the Opos drivers.

Secure receipt saving in case of error.

If an error occurs during printing, the driver checks that the last transaction number has changed before accepting it.

Improved the shutdown of the cash drawer driver

Improved the shutdown of the cash drawer driver

9. CZECH REPUBLIC

9.1. EET Taxbox

The Czech Republic abolished the obligation to submit receipts to the tax authorities during 2022 (electronic records of sales (EET)).

As of 01/01/2023, it is no longer possible to communicate with the portal of the Czech tax authorities (EET). The CPOS taxbox driver Jantar.CPOS.FiscalTaxBox.cz.dll and the EET_Server service must therefore no longer be installed on cash registers in the Czech Republic.

10. SLOVAKIA

10.1. UPOS T88US M2

In order to communicate with UPOS fiscal printers, it is required to install version 3.7.5 or higher of the Cegid CPOS driver « Jantar.CPOS.UPOS.sk.dll ».

Earlier versions of the Cegid CPOS driver are no longer supported by Cegid.

10.1.1. Jantar.CPOS.UPOS.sk.dll Version 3.7.3 on 12/18/2024

Management of returns following VAT rate change in Slovakia

10.1.2. Jantar.CPOS.UPOS.sk.dll Version 3.7.4 on 01/09/2025

In the event of a receipt being rejected by the printer (due to characters not supported by the printer), the receipt will no longer be rejected by Y2.

10.1.3. Jantar.CPOS.UPOS.sk.dll Version 3.7.5 on 01/31/2025

The interface with the Tax Authorities' website does not provide for a discount on a return receipt line.

Return receipts with a discount are therefore rejected during the dialog with the fiscal printer, which itself dialogues with the Tax Authorities' website.

The driver has therefore been modified so as to no longer send the discounts on the return receipts to the fiscal printer. Lines for comments have also been added so that the receipt can be printed with, among other information, the gross amount of the line and the amount of the discount.

11. CBS *_FUNCTIONS_LOCAL_CPOS_*

CBS *_FUNCTIONS_LOCAL_CPOS_* makes it possible to provide CPOS drivers with information that Y2 cannot provide (via CPOS verbs).

Please note: Each version of the CBS contains the functions developed in previous versions.

11.1. 250312_FUNCTIONS_LOCAL_CPOS_Z06_ITM.cptx

Added the function GETPAYMENTPREPAID

This function allows information associated with 'Prepaid' payments to be returned to 'fiscal printer' or 'tax box' type CPOS drivers. There is no need for a system to install the CBS containing this function if the CPOS version of Y2 is later than or equal to 1961.

Y2 version requirements:

- 22.0.0.1964 on 04/14/2025
- 23.0.0.1702 on 04/14/2025
- 24.0.0.1747 on 04/14/2025
- 25 ➔ All versions

11.2. 250903_FUNCTIONS_LOCAL_CPOS_Z07_ITM.cptx

Added the function GETEFTPAYMENTSDATA

This function allows for returning information associated with electronic payments to CPOS drivers of the "fiscal printer" or "tax box" type. ». There is no need for a system to install the CBS containing this function if the CPOS version of Y2 is later than or equal to 1957.
