1. Objectives

The **InventoryTracking** plugin contains private (non-public) services for the operation of the Cegid Retail Inventory Tracking mobile application, available for Android and IOS.
It includes the necessary services:

- ➔ For connecting and creating devices.
- ➔ For the display of the dashboard.
- ➔ For loading the various caches that will be used in online and standalone mode

Reminder: Only public methods for which the contract is published can be used by applications not designed by Cegid. Cegid reserves the right to modify private services without ensuring backward compatibility, and without informing users.

Documentation

The service contract documentation is visible on the IIS server(s) from the software package download page:

"Documentation" is a link that provides access to the documentation list:

- ➔ **Web Services**
  The screen displayed provides access to the Web Services contracts and their properties

Please note: the absence of a contract in the Web Services documentation screen means that the service is not installed or is not public.

- **Exceptions**
  This part provides access to exceptions, classified by type, and according to the plugin.

- **Installation**
  This page allows you to download Web Services installation and consumption documentation.

Y2 versions

This plugin is compatible with the following version of Cegid Retail Y2:

- Version 26

Note:
The # sign at the beginning of the plugin build number corresponds to the major version of Cegid Retail Y2.
