RetailSalesPrice Plugin V05

Cegid Retail Y2 – Version 26

Make more possible

cegid

Preamble

This plugin is a set of web services associated with one or more versions of Cegid Retail Y2.
This document describes its scope of implementation, as well as the changes and corrections made.
Please note: All plugin methods and services can be cited in this document. Only public methods for which the contract is published can be used by applications not designed by Cegid.

Legal notices

Permission is granted under this Agreement to download documents held by Cegid and to use the information contained in the documents only internally, provided that: (a) the copyright notice on the documents remains on all copies of the document material; (b) these documents are used for personal and non-commercial purposes, unless it has been clearly defined by Cegid that certain specifications may be used for commercial purposes; (c) documents will not be copied to networked computers or published on any type of media unless expressly authorized by Cegid; and (d) no changes are made to these documents.

1. OBJECTIVES

The objective of the **RetailSalesPrice** plugin is to offer a service to get the retail price of a list of merchandise, service and financial type items.

Just remind: Only public methods for which the contract is published can be used by applications not designed by Cegid. Cegid reserves the right to modify private services without ensuring backward compatibility, and without informing users.

Documentation

The service contract documentation is visible on the IIS server(s) from the software package download page:

"Documentation" is a link that provides access to the list of documentation:

- **Web Services**
  The screen displayed provides access to the Web Services contracts and their properties
  Please note: the absence of a contract in the Web Services documentation screen means that the service is not installed or is not public.

- **Exceptions**
  This part provides access to exceptions, classified by type, and according to the plugin.

- **Installation**
  This page allows you to download Web Services installation and consumption documentation.

Y2 versions

This plugin is compatible with the following version of Cegid Retail Y2:

- Version 26

Note:
The # sign at the beginning of the plugin build number corresponds to the major version of Cegid Retail Y2.

2. ENGINE

The service is now set to the Obsolete status.
Service replaced by Engine2. It has the status Obsolete and will be removed from versions generated after 2/1/2028.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
RLO	1/2/2023	A2427		151291	#3.265	

GetList

➔ Objectives

This service returns the retail selling price of a list of items with the following characteristics:

- ➔ The price settings in the store record must be set to retrieve the prices.
- ➔ Merchandise, service and financial type items are accepted.
- ➔ It is possible to ask for prices for a closed item.
- ➔ Only single or sized items are authorized.
- ➔ Prices are returned in the store's currency.
- ➔ The TaxExcluded property allows you to search for the tax-exclusive or the tax-inclusive price.
  Please note: these two prices are independent and are not deductible from each other.

Recognition of the item

This service allows the item on each line to be found in two ways:

- Lines.ItemIdentifier.Reference: This property should not be used; it is not reliable.
  In the case of a reference with the same level of priority for several items, nothing can predict which item will be used.
  This property will soon be rendered obsolete.
- Lines.ItemIdentifier.Id: This property identifies an item in a unique way in Cegid Retail Y2 and should be used.

Loyalty price lists

If the UseLoyaltyPriceList property is set to true:

- ➔ The customer should be present in the contract, with a valid loyalty card.
- ➔ The loyalty price should be set in the store, and exist.

Only use this property if the brand or the store handles loyalty pricing.

Limits

This service does not process staff allowances or trade pricing.

Remarque : ce service utilise des services internes à Y2. It is heavily dependent on Core versions.

➔ Improvements

3. ENGINE2

GetDetailFromGeneric

➔ Objectives

This service returns the selling price of a generic items and its dimensions.

➔ Improvements

Cascading discounts are taken into account

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
LDE	2/23/2024	1390487		230834	#4.269	

Prices from the price list were wrongly converted into the folder currency and not in the store currency.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
PCH	2/27/2024	1417689		232147	#4.272	

Added item status, item type and price list type information to the single final trace, to improve service observability.
+ added an exception when the input item does not exist.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
LDE	7/22/2024	1538581		280475	#4.358	

GetListDetail

This operation gives the retail price of a list of merchandise, service and financial type items.

➔ Improvements

The number of items entered into the contract has been increased to 1000.
Correction of time measurement and addition of intermediate measurements.
The service is now Delphi-exposed for possible use by the smart client and deployed to the TaskScheduler for use in scheduled tasks.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
HDA	9/29/2022	A2291		129880 133449	#3.193	

Removal of the deadlock that could occur when Orchestrator triggered a call from the V2 aggregate calculation.
Company settings are now read using the CBP service instead of the Identity plugin.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
HDA	9/8/2023	1226572		188053	#4.78	

Cascading discounts are taken into account

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
LDE	2/23/2024	1390487		230834	#4.269	

If Base price = Current price, the markdown reason is no longer returned, even if a promo price list is used.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
PCH	2/28/2024	1417689		232491	#4.275	

Various optimizations:
- Items/barcodes were checked twice.
- Use GetItemList operation instead of GetItem to retrieve the item settings + paging management for this operation.
- Do not retrieve conversion rates if the request currency=store currency.
- Store restrictions were checked twice.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
PCH	4/22/2024 4/23/2024 4/26/2024 4/30/2024	1466620		251876 252315 252495 253191 254413	#4.317	

If there were 2 base price lists for the generic item, the price list for the dimensioned item was not correct.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
PCH	5/15/2024	1475629		259026	#4.318	

If there was 1 loyalty price list + 1 promotional price list, the base price was not correct.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
PCH	6/19/2024	1522603		269189	#4.319	

Added item status, item type and price list type information to the single final trace, to improve service observability.
Note: This information is available when only one item is processed.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl

LDE	7/22/2024	1538581		280475	#4.358	

The 4 company settings for optimizing price list searches are taken into account, so that price lists are only searched for if they are present in the database.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
PCH	1/2/2025	1653119		339552	#4.440	

In the reply of the operation, a "Detail" section to have has been added for additional information on price lists.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
PCH	1/23/2025	1637431		345321	#4.466	

Fixed so that the promo price list with 100% discount displays a price of 0 in the response, without returning the base price.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
PLA	7/9/2025	1845958	INC0247523	404926	#4.571	

4. MANAGEMENT

CreateOrUpdate

➔ Objectives

This service is used to create and update Retail selling price lists.

➔ Improvements

Correction to correctly populate the GF_SOCIETE, column, with the company identifier and not the store identifier.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
PLA	9/26/2024	1570109	CBO Mail	294175	#4.394	

Modification to set up a retry mechanism (20 trials), when several API consumers try to create price lists at the same time, in order to handle the DUPLICATE-KEY exception during an INERT in the TARIF table.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
PLA	5/7/2025	1570109	1750640	389634	#4.533	

Close

➔ Objectives

This service allows you to close price lists in Y2, to check that the prices returned by Y2 are correct without these price lists.

Publishing of the Close method

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
RLO	1/27/2023	A2397		146974	#3.256	

➔ Improvements

Delete

➔ Objectives

This service allows you to delete price lists in Y2.

Publishing of the Delete method

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
RLO	1/27/2023	A2397		146974	#3.256	

➔ Improvements

5. MerchandiseItemSettings

➔ Objectives

This service returns pricing information for an item or a list of items of type merchandise, i.e., the main data from the Pricing tab of the item record in Y2 Core.

➔ Detailed information is returned according to the value passed in the Fields field:
- Cost: Returns information on cost prices
- Purchase: Returns information on purchase prices
- Selling: Returns information on selling prices

➔ For dimensioned items, the returned information is memorized at dimension level.
➔ Prices are in the folder currency (currency returned in the reply.)
➔ An item is returned in the folder currency only if it complies with the "Sales division in read-only mode" user restrictions.

GetDetail

Returns pricing information for an item of type merchandise.

➔ An item is identified either by its barcode, or its Y2 internal identifier, to be specified in the Id property.
If a barcode is used, the value entered must be prefixed by 'EXT-'
Example with barcode "123456789": "EXT-123456789"
➔ If the item is unknown, an exception is raised.

➔ Improvements

Publishing of the GetDetail method

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
ADU	11/10/2023	A2466		199972	#4.198	

Correction so that no exception is raised when columns GA_CALCPRIXTTC and GA_CALCPRIXHT are null for the item being accessed by the GetDetail method.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
ADU	7/14/2024	1552224	INC0188922	277470	#4.352	

The method is now set to status Beta

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
ADU	2/4/2025	A2508		352696	#4.468	

GetListDetail

Returns pricing information for a list of items of type merchandise.

- ➔ Items are identified either by their barcode, or their Y2 internal identifier. Only one of these two lists "Barcodes" or "Ids" must be specified.
- ➔ If there is an unknown item in the list, it is not returned in the reply.

➔ Improvements

Publishing of the GetListDetail method

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
ADU	11/10/2023	A2466		199972	#4.198	

The method is now set to status Beta

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
ADU	2/4/2025	A2508		352696	#4.468	

When calculating aggregate price lists with pagination, if there were more than 1,000 items, an error message appeared stating "value cannot be null."

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
PCH	2/5/2026	2057445		454079 454241	#5.71	

6. PERIODSSERVICE

➔ Objectives

This service is used to create and return retail selling price list periods with the following characteristics:

- ➔ By default, information is returned from all stores
- ➔ Exceptions per store are returned if requested in the Fields property of the query.
- ➔ User restrictions apply to price lists. Only periods without a price list or associated with a price list authorized for the user will be returned .
- ➔ Store user restrictions will be applied. Only exceptions concerning a store subject to the user's default restriction will be returned in the reply.

Create

This operation is used to create a price list period with its possible exceptions per store.
The creation of a new period requires that:

- ➔ The user has no restrictions on stores and no restrictions on the price lists. In case of restrictions, an exception is raised.
- ➔ The markdown reason must include the type "Price list discount" in its scope of use and must not be closed.
- ➔ For an exception, if the properties for the store are all the same as in the reference period, the exception is not recorded.

➔ Improvements

GetDetail

This service operation gives the characteristics of a period with exceptions per store.

➔ Improvements

GetListDetail

This service operation lists the price list periods with their exceptions per store

➔ Improvements

GetStoreDetail

This service operation gives the characteristics of a price list period for a given store.

➔ Improvements

GetStoreListDetail

This service operation lists the price list periods with information valid for a given store.

➔ Improvements

7. PURCHASEENGINE

GetListDetail

This operation gives the purchase price of a list of merchandise, service and financial type items.

➔ Improvements

Publishing of the GetDetail method

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
PCH	10/19/2023	A2469		196259 196967 198394 199223	#4.205	

The method is now set to status Beta

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
ADU	2/4/2025	A2508		352696	#4.468	

8. SETTINGS

➔ Objectives

This service allows you to retrieve the settings relating to price lists for items, customers and stores

GetCustomer

Returns a customer's price list information.

➔ Improvements

GetItem

Returns price list information for an item.

➔ Improvements

Addition of the item purchase to the reply.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
LDE	10/3/2023	1252542		192529	#4.125	

GetItemList

Returns price list information for an item collection.

➔ Improvements

Addition of the item purchase to the reply.

Dev	Date	CEGID's Ref.	Pb Ref.	Pull request	Plugin Build no.	Quality Ctrl
LDE	10/3/2023	1252542		192529	#4.125	

GetProgram

Returns price list information for a pricing program.

➔ **Improvements**

GetProgramsList

Returns price list information for pricing programs.

➔ **Improvements**

GetRule

Returns rule information for pricing programs.

➔ **Improvements**

GetRulesList

Returns the list of rules for pricing programs.

➔ **Improvements**

GetStore

Returns price list information for a store.

➔ **Improvements**

9. OTHER

Net Framework 4.8

Following Microsoft's announcement about the "end of support for .NET Framework 4.5.2, 4.6 and 4.6.1 as soon as April 26, 2022" the plugin now requires the installation of the .Net Framework 4.8 (runtime) on server components.

Deployment

Publication of the documentation on exceptions
