Supplier Plugin V04

Cegid Retail Y2 – Version 26

Make more possible

cegid

Preamble

This plugin is a set of web services associated with one or more versions of Cegid Retail Y2.
This document describes its scope of implementation, as well as the changes and corrections made.
Please note: All plugin methods and services can be cited in this document. Only public methods for which the contract is published can be used by applications not designed by Cegid.

Legal notices

Permission is granted under this Agreement to download documents held by Cegid and to use the information contained in the documents only internally, provided that: (a) the copyright notice on the documents remains on all copies of the document; material; (b) the use of these documents for personal and non-commercial use unless it has been clearly defined by Cegid that certain specifications may be used for commercial purposes; (c) documents will not be copied to networked computers or published on any type of media unless expressly authorized by Cegid; and (d) no changes are made to these documents.

GetListDetail 7

3. OTHER 9

Net Framework 4.8 9

Scope management 9

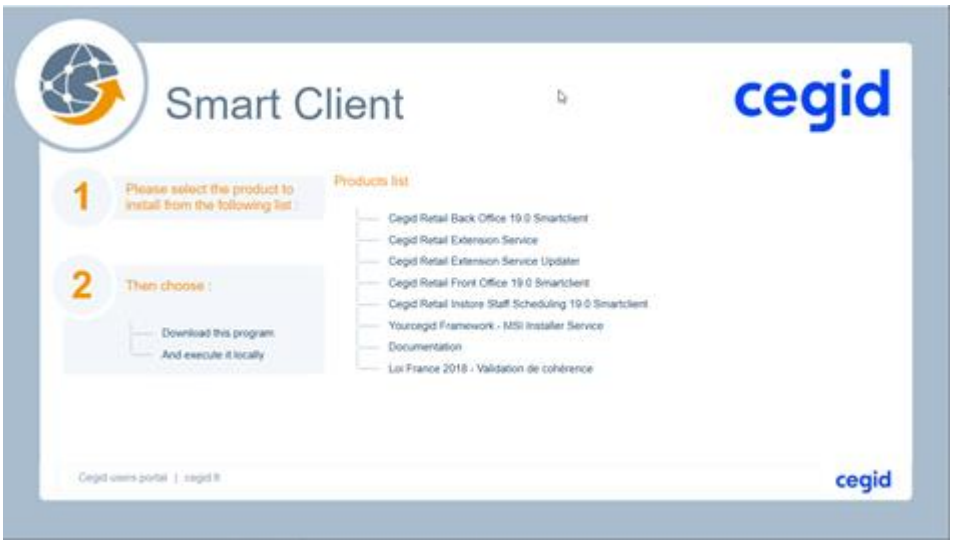
1. Objectives

The objective of the **Supplier** plugin is to provide services relating to the management of suppliers. This service will be gradually enriched.

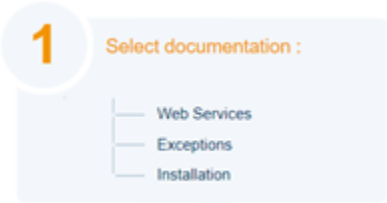
Reminder: Only public methods for which the contract is published can be used by applications not designed by Cegid. Cegid reserves the right to modify private services without ensuring backward compatibility, and without informing users.

Documentation

The service contract documentation is visible on the IIS server(s) from the software package download page:



"Documentation" is a link that provides access to the list of documentation:



- **Web Services**
  The screen displayed provides access to the Web Services contracts and their properties.
  Please note: the absence of a contract in the Web Services documentation screen means that the service is not installed or is not public.

- **Exceptions**

This part provides access to exceptions, classified by type, and according to the plugin.

- **Installation**
  This page allows you to download Web Services installation and consumption documentation.

Y2 versions

This plugin is compatible with the following version of Cegid Retail Y2:

- Version 26

Note:
The # sign at the beginning of the plugin build number corresponds to the major version of Cegid Retail Y2.

2. MANAGEMENT

Suppliers are managed by Cegid Retail Y2 with a lot of information. A supplier record is populated through tabs:

- ➔ General
- ➔ Additions
- ➔ Payments
- ➔ Information
- ➔ User fields

The toolbar allows you to enter additional information:

- ➔ [Zoom Menu] button: Gives access to the commands Current documents, Ordered items, Category price lists, Pricing, Website, Documents summary.
- ➔ [Complementary data] button: Gives access to exceptions, address management, referencing and additional identifiers.
- ➔ [Contacts] button: Allows the registration of contacts with the supplier.
- ➔ [BAID] button: Allows the registration of the supplier's bank account details.
- ➔ [Memos] button: Allows you to associate photos or memos with the supplier's file.
- ➔ [Barcode] button : Allows you to enter specific barcode settings. This button is only visible if the Distinct barcode per supplier option is activated in Administration > Company > Company settings > Commercial management > Items.

GetDetail

➔ Objectives

This method returns the detail of a supplier called by their identifier.
A part of supplier data is returned by this method, with more or less information depending on the tags present in the "Fields" property. This method will be gradually enriched.

The following business rules are applied:

- ➔ The "Id" property is mandatory. The search is performed on the exact value transmitted. In case of unknown code, the reply contains empty information

➔The method has been enriched to return a grouping of supplier information according to the tags indicated in the Fields property. You can select none or several elements *(SystemFields, Communication, Detail, UserDefinedFields*.)

- If the Fields property is set to *SystemFields* the following information is returned:
  Creation date, Last modification date, Last modification user and Creation user.

- If the Fields property is set to *Communication*, the following information is returned:
  Collection of phone numbers, phone type, Website, etc.

- If the Fields property is set to *Detail*, the following information is returned:
  Additional information about the supplier (short description, identification, characteristics, etc.)

- If the Fields property is set to *UserDefinedFields*, the following information is returned:
  Collection (1 to 3) of user-defined amounts
  Collection (1 to 3) of user-defined dates
  Collection (1 to 3) of user-defined tables

RLO	11/3/2022	A2351		138388	#3.5	

GetListDetail

➔ Objectives

This method recovers the supplier list of the folder based on the defined criteria.

The following business rules are applied:

- ➔ The description is not mandatory. If it is present, a "LIKE" is performed on this property.
- ➔ If the "Closed" property is missing, all suppliers meeting the other criteria are returned.

➔The method has been enriched to return a grouping of supplier information according to the tags indicated in the Fields property. You can select none or several elements *(SystemFields, Communication, Detail, UserDefinedFields*.)

- If the Fields property is set to *SystemFields* the following information is returned:
  Creation date, Last modification date, Last modification user and Creation user.

- If the Fields property is set to *Communication*, the following information is returned:
  Collection of phone numbers, phone type, Website, etc.

- If the Fields property is set to *Detail*, the following information is returned:
  Additional information about the supplier (short description, identification, characteristics, etc.)

- If the Fields property is set to *UserDefinedFields*, the following information is returned:
  Collection (1 to 3) of user-defined amounts
  Collection (1 to 3) of user-defined dates
  Collection (1 to 3) of user-defined tables

3. OTHER

Net Framework 4.8

Following Microsoft 's announcement about the "end of support for .NET Framework 4.5.2, 4.6 and 4.6.1 as soon as April 26, 2022" the plugin now requires the installation of the .Net Framework 4.8 (runtime) on server components.

Scope management

From version 22.0.3.39, for any service call made with an authentication by ApiKey, the plugin now requires the consumer of the service to position in the ApiKey the scope corresponding to the called method.

Service	Method	Scope
Management	GetDetail, GetListdDetail	suppliers:read
UserDefinedTables	GetLabels, GetValues, GetValue	suppliers-user-defined-tables:read
	UpdateLabel, CreateOrUpdateValue	suppliers-user-defined-tables:write

Swagger

Rest/Restful APIs grouped by plugin, with the option of selecting them by plugin name.
